

6th Weekend Seminar on Philosophy of Physics

at Radboud Universiteit Nijmegen

6 – 8 September 2024

Topic: Fundamentality and Emergence

The workshop is aimed especially at undergraduate and graduate students of philosophy or physics, but also at students of other disciplines. Participants will be introduced to the research field of philosophy of physics in lectures and discussion groups. There will also be the chance (no obligation!) to present own work (please include a 200 word abstract if you're interested). For the approximately 20 participants, two overnight stays and possibly part of the travel expenses will be covered. Previous knowledge of physics or philosophy is not required.

Lectures

Karen Crowther (Oslo)
Klaas Landsman (Nijmegen)
Vera Matarese (Perugia)
Patricia Palacios (Salzburg)
Manus Visser (Nijmegen)
